Fishbone Group: roles, load and dashboard

v1.0 DRAFT for review. Owners: Minda and Andrejus. Prepared 22 October 2026. Not final: Andrejus's view and additions are wanted before approval.

1. Aim

Share the load fairly, measured by completed work and not by hours. Both of you see the same picture.

2. Roles

Area	Owner	Doer / support
Operating system, finance	Minda only	Rachel, Eugene, Alex
Legal, H&S, IT	Minda	Tasks delegated to Andrejus
Construction projects	Minda	Tasks delegated to Andrejus
Workshop production	Minda	Darius, then a new hire
Amfa sales and marketing	Andrejus	Nadia, Helen
Clients (except Macdonald)	Andrejus	
Macdonald relationship	Minda	Review 3 months after Andrejus starts
Vehicles, tools and equipment, purchasing	Andrejus does	Minda owns the system
Compliance, HR (hiring, contracts, training)	Andrejus does	Minda owns the system
Property decisions, banking, insurance	Minda	Andrejus approval

3. Measuring

- Completed work is scored by size. Size is calculated by formula, never set by hand.
- **Large (8):** £5,000 or more at risk, or a legal, safety or regulatory deadline, or a major client (Macdonald, or any client above 10% of turnover).
- **Medium (3):** £500 or more at risk.
- **Small (1):** everything else.
- Project delivery is “calibrating”: only big milestones are logged for now.

4. Hub changes

- Andrejus is added as an owner.
- Each row gets three answers (money at risk, legal/safety deadline, major client), and the size is a formula.
- All tasks and routines live in the Hub, and recurring duties create their own tasks.

5. Dashboard (private web page, data from the Hub)

- Completed weighted work per person this week and over time.
- Open and overdue items per person.
- Role map with unowned duties in red.
- Project delivery marked “calibrating”.

Mock-up with sample numbers only (not real data):

	This week	4-week trend	Open	Overdue
Minda	24 points	▁▃▆█	9	3
Andrejus	6 points	▁▁▃▅	4	0
Share	80 / 20			

6. Review and open items

- Review the formula, thresholds and balance after 1 to 2 months.
- Andrejus's budget is open until the Amfa process is mapped.
- His assistant is built after this draft is approved.
- The ISO accountability roles need matching to the new split.

7. Andrejus's view and additions

Name for your assistant: _____
